

Intelligent Infrastructure Orchestration

Unify metrics from Kubernetes, databases, networks, and cloud services. Correlate signals intelligently. Monitor system health in real-time.

THE CHALLENGE

- Alert fatigue from hundreds of disconnected metrics
- No unified view of infrastructure health
- Siloed monitoring tools (APM, logs, infra)

THE SOLUTION

- Unified multi-source ingestion
- Real-time correlation analysis
- Priority-based signal routing

KEY CAPABILITIES

100+

Sources/Gateway

5ms

Correlation Latency

P1-P5

Priority Levels

24/7

Health Monitoring
