

Intelligent Equipment Orchestration

Unify data from PLCs, SCADA, MES, and industrial sensors. Correlate machine signals intelligently. Monitor production health in real-time.

THE CHALLENGE

- Machine data scattered across systems
- No unified view of equipment health
- Siloed OT tools (PLC, SCADA, MES)

THE SOLUTION

- Unified multi-source data ingestion
- Real-time equipment correlation
- Priority-based alert routing

KEY CAPABILITIES

100+

Machines/Gateway

<5ms

Correlation Latency

P1-P5

Alert Priority

24/7

Production Monitoring
